● Origin: China

● M.O.Q: 500 Pieces.

SKU: BPHH02113 Category: [Shower Head](#) Tags: [Chrome](#), [Massage](#), [Spray](#)

Description

Hand-held Showerheads are the most popular Shower Head type on the market. Whether you are building out a new shower or just need to replace your existing Shower Head, this is such a versatile option.

These are connected to the wall by a flexible tube or hose, allowing a range of motion. Hand-held showerheads most often hang on a fixed-mount bracket, which can hang low or high on the wall depending on your needs. Simply pull the Shower Head off the wall and control where the water goes.

They're also useful for bathing children and pets, and they make cleaning the shower and tub easy. Also for those who are recovering from an injury or are elderly and need to sit on a Shower Bench.
