- M.O.Q: 500 Pieces.

SKU: BPHH27013 Category: [Shower Head](#) Tags: [Chrome](#), [Flow Regulator](#), [Massage](#), [Spray](#)

## Description

---

Hand-held Showerheads are the most popular Shower Head type on the market. Whether you are building out a new shower or just need to replace your existing Shower Head, this is such a versatile option.

These are connected to the wall by a flexible tube or hose, allowing a range of motion. Hand-held showerheads most often hang on a fixed-mount bracket, which can hang low or high on the wall depending on your needs. Simply pull the Shower Head off the wall and control where the water goes.
